Performance for the USD Class I Dist. The class launched on 1 July 2015. Performance data is shown in USD. Source: Northern Trust International Fund Administration Services (Ireland) Ltd. Benchmark performance shown in USD. Source: Bloomberg.

If this is not your local currency, exchange rate fluctuations may cause performance to increase or decrease when converted into your local currency.

Performance data takes account of fees paid by the fund but does not take account of any commissions or costs you may pay when subscribing for or redeeming shares or any taxes or securities account charges that you may pay on your investment in the fund. Such charges will reduce the performance of your investment. Performance data assumes that any income has been reinvested.

1. Performance is representative of the Institutional USD Accumulation share class which launched on 1 July 2015. Prior to this the performance figures are representative of the B2 Institutional GBP Accumulation share class converted to USD, which launched on 15 October 2009.

2. On 13 June 2014, the Polar Capital Income Opportunities Fund was re-named from the Polar Capital Financials Income Fund which was launched on 15 October 2009 (the HIM Income Fund, launched October 2009, was merged into the Polar Capital Financials Income Fund on 1 July 2011).

3. Historic yield is based on a NAV per share of US\$2.04 and income of US\$0.0875 per unit paid in the last 12 months, based on USD Institutional distribution units. **WARNING: Investors should note that historic yield does not measure the overall performance of a fund. It is possible for a fund to lose money overall but to have a positive historic yield. Historic yield cannot be considered as being similar to the interest rate an investor would earn on a savings account.**

Risks

- Capital is at risk and there is no guarantee the Fund will achieve its objective. Investors should make sure their attitude towards risk is aligned with the risk profile of the Fund.
- Past performance is not a reliable guide to future performance. The value of investments may go down as well as up and you might get back less than you originally invested.
- The value of a fund's assets may be affected by uncertainties such as international political developments, market sentiment, economic conditions, changes in government policies, restrictions on foreign investment and currency repatriation, currency fluctuations and other developments in the laws and regulations of countries in which investment may be made. Please see the Fund's Prospectus for details of all risks.
- The Fund may enter into a derivative contract. The Fund's use of derivatives carries the risk of reduced liquidity, substantial loss and increased volatility in adverse market conditions, such as failure amongst market participants.
- The use of derivatives will result in the Fund being leveraged (where market exposure and the potential for loss exceeds the amount the Fund has invested) and in these market conditions the effect of leverage will magnify losses. The Fund makes extensive use of derivatives.
- If the currency of the share class is different from the local currency in the country in which you reside, the figures shown in this document may increase or decrease if converted into your local currency.

Glossary

Active Share

Active Share is a measure of the percentage of stock holdings in a fund that differ from the benchmark index.

Alpha

The excess return on an investment in the fund compared to the benchmark.

Annual Fee

A charge made each year to cover the expenses associated with running the fund. Although it is expressed in annual percentage figures it is usually split into 12 monthly amounts and taken from the fund monthly.

Base Currency

The currency in which the net asset value of each portfolio is calculated.

Discrete Annual Performance

Discrete performance is calculated between two fixed specific time and static dates.

Fixed Income

Any type of investment under which the borrower or issuer is obliged to make payments of a fixed amount on a fixed schedule.

Geographic Exposure

The geographical location in which the holdings of the Fund are listed. Exposure represents the relative risk particular to the percentage of investment in that particular geographic location.

Hedged Class

A share class which is denominated in a currency other than the base currency of the portfolio. The investment manager employs techniques and instruments to protect against fluctuations between the class and the base currency of the portfolio.

Historic Yield

A measure of the dividend return of a fund. It is calculated by dividing the dividend per share for a particular period of time by the NAV per share at a particular date and multiplying by 100.

Market Capitalisation Exposure

The percentage of the fund's assets that are invested in companies having market capitalisation of a particular size.

NAV per Share

Is an expression for net asset value that represents a fund's value per share. It is calculated by dividing the total net asset value of the fund or company by the number of shares outstanding.

Ongoing Charges Figure (OCF)

This is a figure representing all annual charges and other payments taken from the fund.

Share Class

Share class is a designation applied to a share in a fund. Different share classes within the same fund will confer different rights on their owners.
