Risks

- Capital is at risk and there is no guarantee the Fund will achieve its objective. Investors should make sure their attitude towards risk is aligned with the risk profile of the Fund.
- Past performance is not a reliable guide to future performance. The value of investments may go down as well as up and you might get back less than you originally invested.
- The value of a fund's assets may be affected by uncertainties such as international political developments, market sentiment, economic conditions, changes in government policies, restrictions on foreign investment and currency repatriation, currency fluctuations and other developments in the laws and regulations of countries in which investment may be made. Please see the Fund's Prospectus for details of all risks.
- The Fund may enter into a derivative contract. The Fund's use of derivatives carries the risk of reduced liquidity, substantial loss and increased volatility in adverse market conditions, such as failure amongst market participants.
- The use of derivatives will result in the Fund being leveraged (where market exposure and the potential for loss exceeds the amount the Fund has invested) and in these market conditions the effect of leverage will magnify losses. The Fund makes extensive use of derivatives.
- If the currency of the share class is different from the local currency in the country in which you reside, the figures shown in this document may increase or decrease if converted into your local currency.

Glossary

Active Share

Active Share is a measure of the percentage of stock holdings in a fund that differ from the benchmark index.

Alpha

The excess return on an investment in the fund compared to the benchmark.

Annual Fee

A charge made each year to cover the expenses associated with running the fund. Although it is expressed in annual percentage figures it is usually split into 12 monthly amounts and taken from the fund monthly.

Base Currency

The currency in which the net asset value of each portfolio is calculated.

Discrete Annual Performance

Discrete performance is calculated between two fixed specific time and static dates.

Geographic Exposure

The geographical location in which the holdings of the Fund are listed. Exposure represents the relative risk particular to the percentage of investment in that particular geographic location.

Hedged Class

A share class which is denominated in a currency other than the base currency of the portfolio. The investment manager employs techniques and instruments to protect against fluctuations between the class and the base currency of the portfolio.

Long

Buying stocks/shares and other securities with the aim of generating capital gains and income from positive performance of those assets.

Market Capitalisation Exposure

The percentage of the fund's assets that are invested in companies having market capitalisation of a particular size.

NAV per Share

Is an expression for net asset value that represents a fund's value per share. It is calculated by dividing the total net asset value of the fund or company by the number of shares outstanding.

Ongoing Charges Figure (OCF)

This is a figure representing all annual charges and other payments taken from the fund.

Share Class

Share class is a designation applied to a share in a fund. Different share classes within the same fund will confer different rights on their owners.

Short

Borrowing shares to sell in the open market with the goal of buying these shares back at lower prices in the future, and at that time returning the shares to the lender.
