Melchior European Absolute Return Fund, a sub-fund of MELCHIOR SELECTED TRUST

Class: I2 USD (hedged), (Accumulation) LU0476438725

This Fund is managed by Edmond de Rothschild Asset Management (Luxembourg)

Objectives and Investment Policy

- The objective of the Fund is to achieve capital growth.
- The Fund invests primarily in shares of companies which are listed on a stock exchange in the European region or of companies that have their registered office, or carry out a predominant portion of their economic activity in the European region.
- The Fund may also invest up to 10% in non-European equities or using derivatives to generate exposure to such equities.
- The Fund is permitted to utilise leverage. It is not expected to exceed 300%, but investors should be aware that higher levels are possible.
- The Fund seeks to maximise returns by purchasing shares (or financial instruments giving exposure to them) of companies perceived to be undervalued. Conversely, it seeks to generate returns by “shorting” companies perceived to be overvalued. This is achieved through the use of derivatives (financial instruments whose value is linked to the expected future price movements of the underlying assets).
- “Shorting” is a transaction which allows the investor to profit from a company’s share price dropping.
- The Fund is actively managed within its objectives and references 1 month Libor (in the currency of the share class) for comparative purposes only. There are no restrictions on the extent to which the Fund’s portfolio and performance may deviate from that of the comparative benchmark.
- The Fund aims to improve its sustainability profile by integrating and promoting Environmental, Social and Governance (“ESG”) characteristics (as defined in Article 8 of the European Sustainable Finance Disclosure Regulation) by assessing and screening shares issued by companies prior to investing. The Fund will not invest in companies whose business activity (i.e. one that accounts for more than 5% of the relevant company’s revenue, unless otherwise specified) involves the following products and services:
 - controversial weapons (completely excluded);
 - provision or delivery of adult entertainment;
 - production and distribution of palm oil;
 - provision of predatory lending;
 - extraction and production of thermal coal or the generation of power from thermal coal;
 - manufacture and distribution of all tobacco; and
 - provision of unregulated gambling.
- The Fund does not focus on a particular industry or sector.
- You can buy, sell and switch shares in the Fund on any Luxembourg business day. An instruction received before 14:00 CET will be bought/sold at the price on the next dealing day in Luxembourg.
- Any income is reinvested into the Fund.

Risk and Reward Profile

The risk category is calculated using either historical volatility or the risk limit of the Fund, based upon methods set by European Union rules. It may not be a reliable indicator of the Fund’s future risk profile. It is not a measure of capital gain or loss is not guaranteed and may change over time. The lowest risk number does not mean risk free.

The significant use of derivative instruments may generate relatively high levels of leverage. Leverage occurs when the economic exposure created by the use of derivatives is greater than the amount invested. Such leverage may result in greater fluctuations of the Net Asset Value of the Fund and therefore can result in a loss greater than the amount invested in the derivative itself.

The share class is in the risk category indicated above due to rises and falls of its price or simulated data in the past. Share classes that seek to provide rewards with a low level of volatility are indicated by a 1-2, whereas a 3-5 indicates a medium level of volatility and 6-7 a high level of volatility.

Volatility is influenced by changes in stock market prices, currencies and interest rates, which can be affected unpredictably by diverse factors including political and economic events.

Please note that the value of investments and any income you receive from them may go up as well as down. This means that you may not get back your original investment. The Fund does not offer any asset protection guarantees.

All the risks currently identified as being applicable to the Fund are set out in the “General Risk Considerations” section of the Prospectus.

The Fund carries a sustainability risk, as defined in the risk profile in the Prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including marketing and distributing costs. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	5.00%
Exit charge	None

This is the maximum that might be taken out of your money (before it is invested / before the proceeds of your investment are paid out).

Charges taken from the Fund over a year

Ongoing charges	1.81%
------------------------	-------

Charges taken from the Fund under specific conditions

Performance fee	0.00% for the Fund's last financial year
------------------------	--

A performance fee of 20% a year of any returns achieved above the hurdle (1 month Libor in the currency of the Share Class) will be applied.

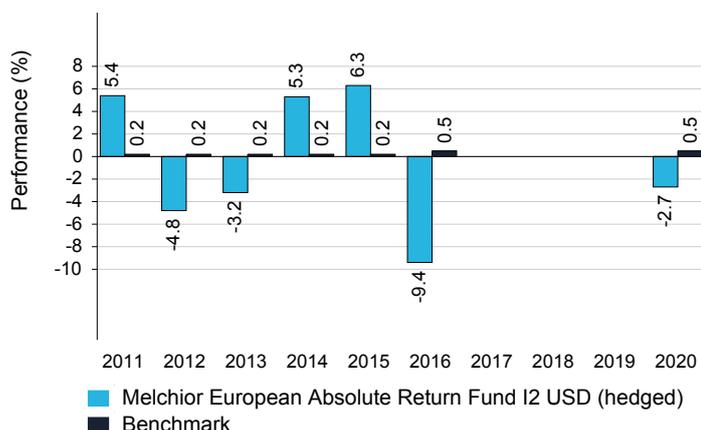

The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser.

The ongoing charges figure is based on annual expenses for the year ending 31 December 2020 and may vary from year to year. It excludes performance fees and portfolio transaction costs (unless these assets are shares of another fund).

In the case of significant subscriptions or redemptions a dilution levy may be applied.

For more information about charges, please see the 'Charges and Expenses' section in the most recent prospectus.

Past Performance

Past performance has been calculated after the deduction of charges, but excluding any entry/exit charges.

It is not a reliable indicator of or a guide to future performance.

Fund creation date: 2 February 2010
