The holdings may represent only a small percentage of the aggregate portfolio holdings, are subject to change without notice, and may not represent current or future portfolio composition. Benchmark: The following benchmark index is used: MSCI North America Net Total Return Index. This benchmark is generally considered to be representative of the US Equity Universe. This benchmark is a broad-based index which is used for comparative/illustrative purposes only and has been selected as it is well known and is easily recognizable by investors. Please refer to www.msicbarra.com for further information on this index. Comparisons to benchmarks have limitations as benchmarks' volatility and other material factors may differ from the Fund. Security holdings, industry weightings and asset allocation made for the Fund may differ significantly from the benchmark. Accordingly, investment results and volatility of the Fund may differ from those of the benchmark. The index noted in this document is unmanaged, unavailable for direct investment, and is not subject to management fees, transaction costs or other types of expenses that the Fund may incur. The performance of the index reflects reinvestment of dividends and, where applicable, capital gain distributions. Therefore, investors should carefully consider these differences when evaluating comparative benchmark data performance. Information regarding the index is included merely to show general trends in the periods indicated and is not intended to imply that the Fund was similar to the index in composition or risk. Risk: Factors affecting fund performance may include changes in market conditions (including currency risk) and interest rates, as well as other economic, political, or financial developments. The Fund's investment policy allows for it to enter into derivatives contracts. Leverage may be generated through the use of such financial instruments and investors must be aware that the use of derivatives may expose the Fund to greater risks, including, but not limited to, unanticipated market developments and risks of illiquidity, and is not suitable for all investors. Past performance is not a guide to or indicative of future results. Future returns are not guaranteed and a loss of principal may occur. Polar Capital LLP may also receive a performance fee based on the appreciation in the NAV per share and accordingly the performance fee will increase with regard to unrealised appreciation, as well as realised gains. The performance fee may create an incentive for Polar Capital LLP to make investments for Polar Capital Funds plc which are riskier than would be the case in the absence of a fee based on the performance of Polar Capital Funds plc.
